

AURORA SHELVING PRODUCTS

FULL HEIGHT X-RAY DIVIDERS

Aurora Shelving Products Full Height X-Ray Dividers, 1616FHD (Single Entry) and 1616FHDDE (Double Entry) allow you to customize a medical storage unit and retain all the advantages of our standard bin type unit. These full height dividers use DS slotted shelving and install without hardware.

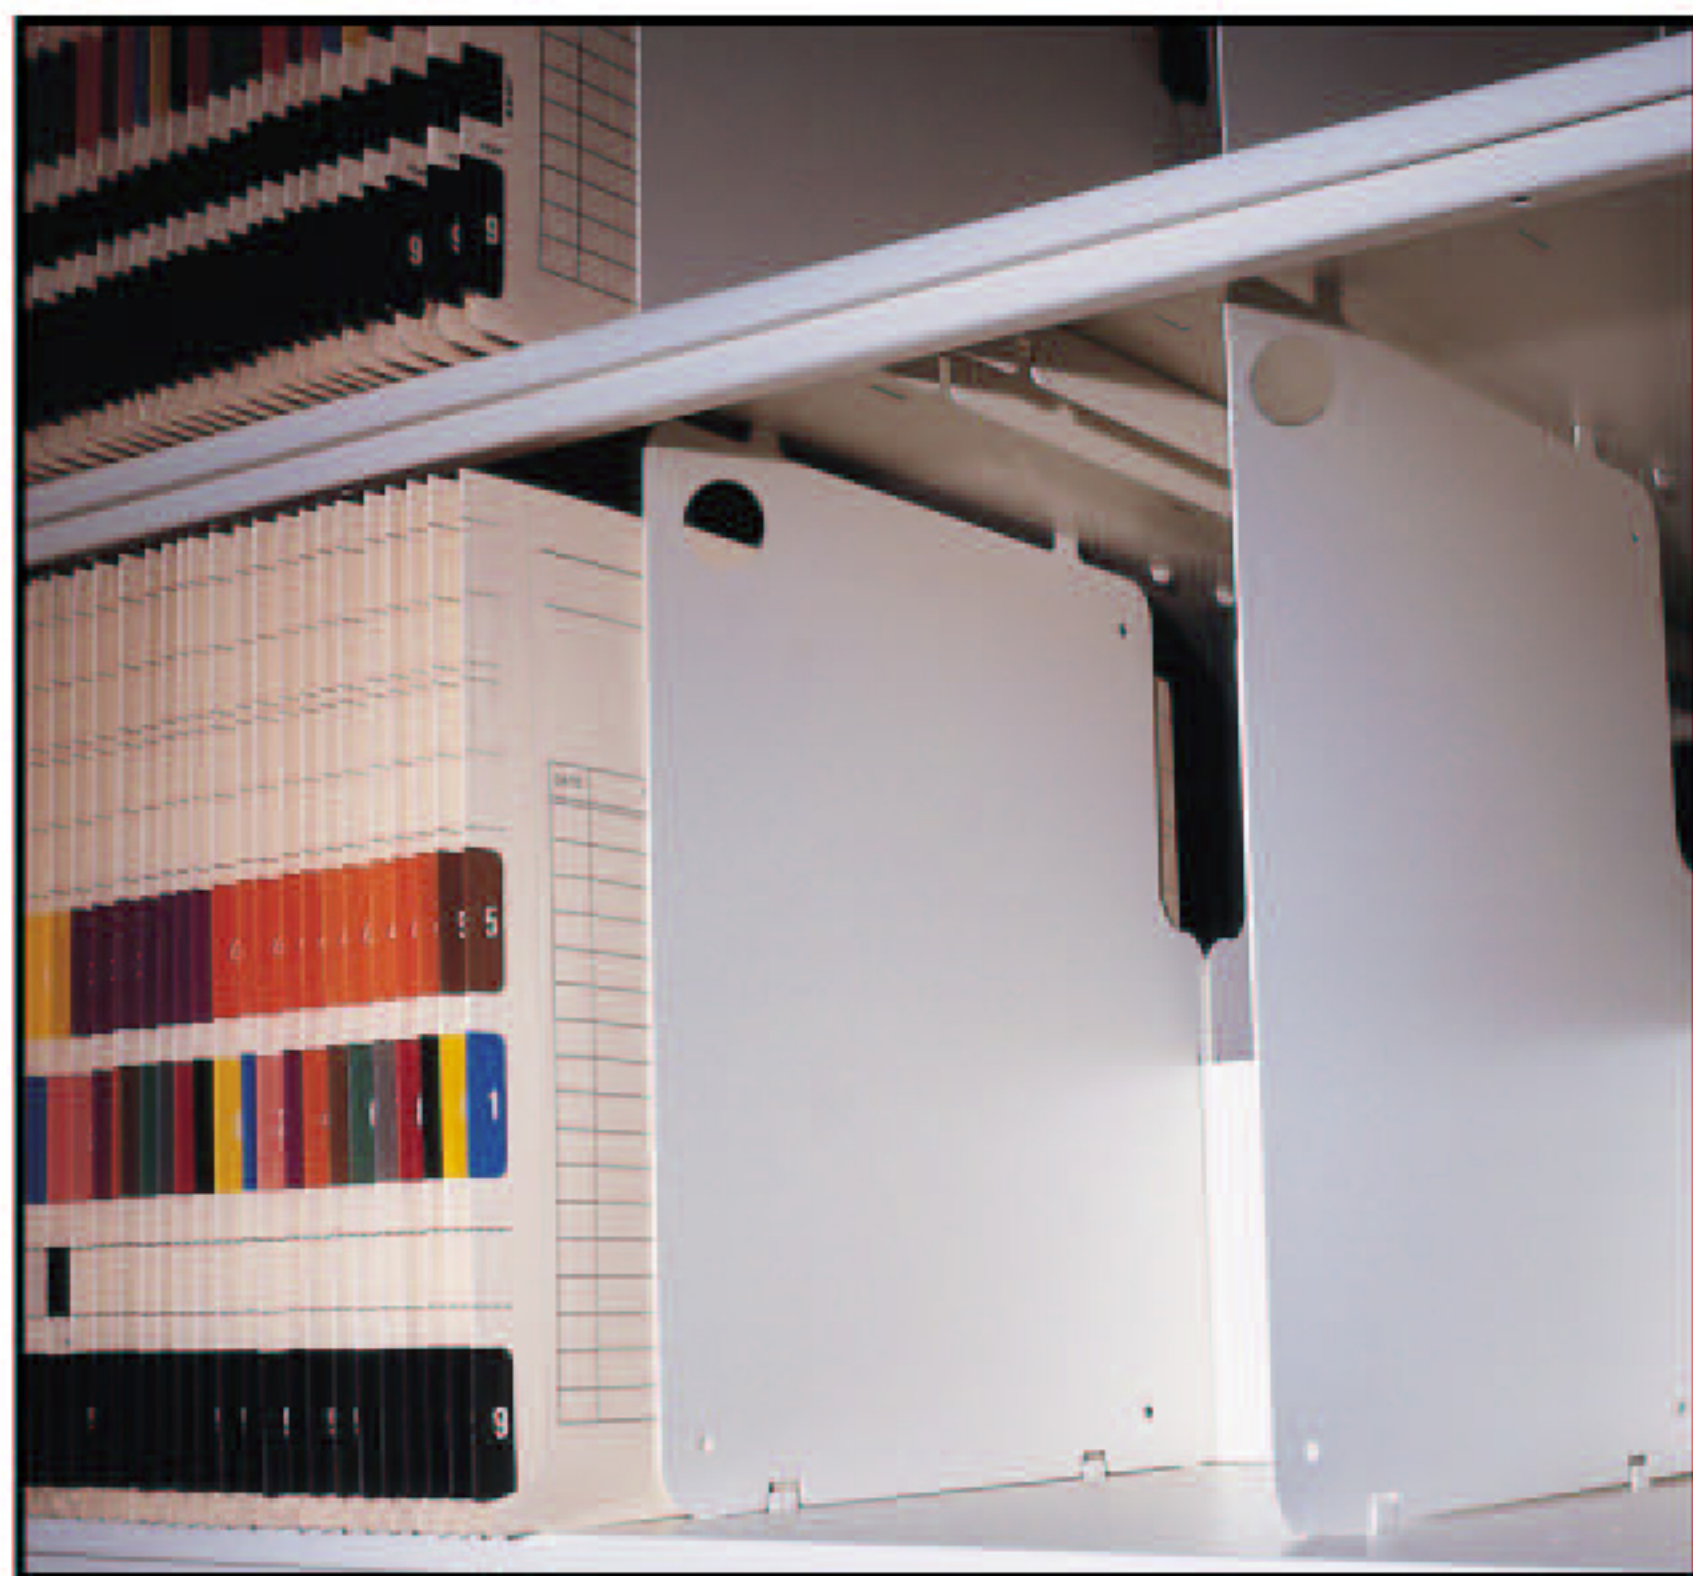

We have added extra slots on all 18" and 36" deep slotted shelves to accommodate the 1616FHD and 1616FHDDE, as well as the 1610FD divider. This slot pattern provides a greater variety of "bin" openings.

Now you have the ability to house X-ray jackets in either single or true double entry bin type units. The versatility and strength of the Full Height X-Ray Dividers will allow for new and creative uses of Aurora Shelving with the added benefit of easy assembly.

The word "AURORA" is written in a large, white, serif font. A green, stylized graphic element, resembling a swirl or a ribbon, is positioned behind the letters, starting from the left and ending on the right.

AURORA SHELVING PRODUCTS

FULL HEIGHT X-RAY DIVIDERS

SPECIFICATIONS

- Dividers are designed to be used with 18" and 36" deep DS Double Slotted Shelves.
- Dividers install on 16 1/2" centers and provide a clearance of 15 1/4".
- To have 5 equal openings each on a 16 1/2" center, use 85 1/4" uprights and a 2 3/4" Quik-Base™.
- A DS Shelf must be used as the top shelf.
- Dividers are available in all 26 standard ASP colors as well as custom colors.
- Standard lead times are in effect.
