Aurora Mobile Storage Systems

Once you select the Aurora Mobile that works best for your business or institution, you can customize it to meet your exact needs. Choose from a wide range of shelving options, add decorative end panels for executive areas, select from two different control handles and consider rollout reference shelves for added convenience. When you work with Richards-Wilcox on a storage project you will find that the possibilities are almost endless.

AURORA™ MOBILE STORAGE SYSTEMS

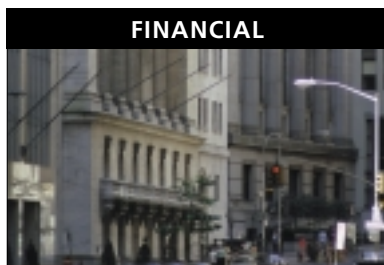

SAVE FLOOR SPACE

INCREASE STORAGE CAPACITY

Discover the Possibilities

When space is limited, open up to the possibilities with Aurora Mobile Storage Systems

No matter what your business environment, space is valuable and, an Aurora Mobile can help you utilize your space more efficiently. By rolling right up against each other and gliding apart for easy access, an Aurora Mobile eliminates the multiple aisles required in static shelving and filing systems. Depending on your current shelving arrangement, an Aurora Mobile could store your materials in as little as half the space — freeing up valuable square footage for the growth of your business.

Finishes

Aurora Mobile offers 26 painted finishes and a variety of laminates to choose from.

Aurora Low Profile

Low Profile puts all your files within easy reach. The 3¹⁵/₁₆" high carriage makes this mobile system ideal for letter and legal filing as well as other light duty applications. Its fully welded carriage supports 1000 pounds per linear foot and is available through 24 feet long.

Mobile Versatility

With Aurora Mobile, any number of office storage solutions are possible. If you want to use lateral files but you don't want to waste floor space, mount the laterals on Aurora Mobiles. Aisles disappear yet the laterals appear when needed. Aurora Mobile can hold static shelving such as Aurora Shelving, Wood-Tek shelving, special accessories for all types of files and documents and even custom storage solutions for one-of-a-kind products.

PowerPlus™

The smooth gliding operation of PowerPlus Electric Mobile allows for soft starts and stops, a definite 'plus' in any office setting. Busy offices depend on speedy and dependable access to active files. PowerPlus can be configured with multiple aisles without compromising safety. System indicator lights alert the user of the unit's operational status. And with PowerPlus, an aisle can be accessed before it is fully opened to increase your productivity.

Aurora Office 1000

The Aurora Office 1000 can handle the weight of all your office storage materials. Ideal for most applications, this rugged, computer-engineered system can easily accommodate up to 1000 pounds per linear foot. Carriages are available in lengths from 3' to 24', and it's available in manual or mechanical assist.

Aurora Side-To-Side

Side-To-Side Lateral Mobile is a modular storage system comprised of two or three rows that move laterally on heavy duty rails. Every time a unit is moved, another unit is exposed to allow access to documents, supplies or products. Available in different shelving heights, Side-To-Side will store letter and legal documents, X-Ray film and even lateral cabinets. Aurora shelving for Side-To-Side units is available in 36", 42" and 48" widths. The system is designed to expand as your storage needs grow. Simply add another section of shelving or add a third row of shelving.

Power3™

This intelligent mobile storage system will change the way you work. A computerized control sets a new standard for setup, safety, and flexibility. Healthcare entities facing Health Insurance Portability and Accountability Act (HIPAA) compliance have already discovered that Power3™ can help them bring tighter security for patient record filing. Changing access and security privileges is simple. Programmable transponders eliminate the need for system keys, locks, codes and expensive training.
